AKUJUOBI VICTOR CHIBUIKE

PROFESSIONAL

Full stack Developer specializing in React.js and Next.js, with experience building scalable, responsive, and SEO-friendly web applications. Proficient in modern JavaScript, component-based architecture, and API integration. Adept at transforming design concepts into efficient, high-quality user interfaces while maintaining performance and accessibility standards.

Skills

- React.js, Next.js, JavaScript (ES6+), PHP - Laravel, MYSQL
- HTML5, CSS3, Tailwind CSS
- Redux, Context API
- Express Nodejs, Git, REST APIs, AWS EC2, GitHub Deploy

EXPERIENCE

Mabi Movies – Movie Web Application (Frontend) (Remote)
Technologies: React.js, Next.js, Tailwind CSS (Repo: Private)
2023 – Present

1. I developed and maintained responsive and dynamic user interfaces using Next.js and React.js.
2. I worked closely with design and backend teams to implement high-quality web features.
3. I optimized web applications for performance and scalability, integrated APIs and third-party services to enhance functionality, and troubleshooted and debugged issues to ensure a seamless user experience.
4. Additionally, I participated in code reviews and contributed to best practices in frontend development.

IT Support Specialist (On Site)

Securities and Exchange Commission (SEC) (NYSC)
2023 – 2024

1. Demonstrated punctuality and reliability in all work tasks.
2. Provided technical support to staff, ensuring smooth daily operations.
3. Installed and configured network routers to support secure and efficient connectivity.
4. Offered IT support during internal capital markets seminars, symposiums, and workshop programs.
5. Designed graphics for events and internal communications.
6. Monitored network connections by pinging IP addresses to ensure proper connectivity.

PROJECTS

PropertySpot – Real Estate Web Application (Frontend)

Technologies: HTML5, CSS3, JavaScript, REST API (Repo: Private)

Project Year: 2024 - 2025

1. Developed the complete frontend of a real estate web application using HTML5, CSS3, and Vanilla JavaScript
2. Integrated RESTful APIs to fetch and display dynamic property listings and related data
3. Built responsive and user-friendly interfaces for property browsing, filtering, and search functionality
4. Created reusable UI components and structured layouts for consistency across the application
5. Implemented interactive features including forms, filters, and dynamic UI behaviors using JavaScript
6. Optimized the application for mobile responsiveness, cross-browser compatibility, and performance
7. Handled API data rendering, including loading states and error handling for improved user experience

Delivery Rider Onboarding Page – Uvicol Store

Technologies: HTML, CSS, JavaScript (Repo: Private)

Project Year: 2023

1. Designed and developed a responsive onboarding page for logistics riders to register for delivery services
2. Built interactive form handling using JavaScript for user input validation
3. Applied responsive design principles to ensure compatibility across mobile and desktop devices
4. Structured layout and styling using modern HTML5 and CSS3 practices

GitHub: <https://github.com/Loyalcod/uvicolRegForm>

Covenda AI – AI Security Operations Platform (Frontend) (MVP)

Technologies: React.js, Astro.js, Tailwind CSS (Remote)

Project Year -2023

6. Designed and developed the UI/UX for websites from scratch using React.js, Tailwind CSS, and Astro.js.
7. Created user-centered design prototypes and wireframes to map out intuitive user journeys.
8. Developed and iterated on visual designs, ensuring consistency, aesthetic appeal, and usability.
9. Led the design process from concept to execution, focusing on responsive, mobile-first designs.
10. Collaborated with stakeholders to gather requirements and translate them into design solutions that meet both business and user needs.
11. Conducted user research and usability testing to refine the design and improve the overall user
